Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Group I, claim(s) 1-6 and 13-16, drawn to a process for producing an unstretched film.
 - II. Group II, claim(s) 7-10, 17, and 18, drawn to a process for producing a resin-coated metal sheet.
 - III. Group III, claims 11 and 12, drawn to an apparatus for producing an unstretched film.
3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The only common technical feature of Groups I-III, coextrusion of two different thermoplastic resins to form an unstretched film, having the first resin in the film's center and the second resin on both sides of the film, is known in the art, as evidenced by Sato

et al. (JP 08-207119 [of record]: Abstract; Fig. 3; [0020]). This common technical feature, being known in the art, is therefore not a special technical feature, such that Groups I-III do not relate to a single general inventive concept.
